■ Introduction

Save Comp as Project is a script that allows you to export selected comp as independant projects.

It features options such as file collection, subfoldering and versioning.

■ Requirements

In order to run Save Comp as Project, you'll need After Effects CS5 or above.

File Collection is disabled in the demo version.

■ Limitations

After Effects allows you to import Adobe Illustrator and Adobe Photoshop files as footage (default behavior) or as compositions. When imported as composition, due to scripting limitations, the file might not get collected and won't be relinked.

■ Version History

- v2.0
 - Added: File collection
- v1.0
 - Initial release

■ Contact

For everything related to licencing you should [contact aescrpts](#) and open a ticket there.

For every other questions or requests, the best way is to add a comment on [Save Comp as Project's aescrpts forum](#).

If you want something more private, you can [contact me here](#) or through [Twitter @Yenaphe](#).
