Installation

To install "Quick Delete & Reset", copy the .jsxbin file and the resources folder into your "ScriptUI Panels" folder within your After Effects directory:

Windows:

C:\Program Files\Adobe\Adobe After Effects (Version)\Support Files\Scripts\ScriptUI Panels

Mac:

Applications/Adobe After Effects (Version)/Scripts/ScriptUI Panels

Restart After Effects and run the script by clicking Window > Quick Delete And Reset

If it is the first time opening the script, you will be asked if you want to use it in trial mode, or if you want to enter your registration key for the full version.

The trial version is limited to 7 days and 4 layers. Only the first 4 layers will be processed.

About

Quick Delete & Reset enables you to quickly delete, disable, enable or reset different aspects of a layer with a single click.

Select one or multiple layers in the timeline and choose one of the following options:

Delete Keys:

Deletes all the keyframes of a layer. The layer's properties will keep the values, which they had at the current time. Therefore move the current time indicator in the timeline to the desired position, before deleting the keyframes.

Delete Effects:

Deletes all the effects, which were applied to a layer.

Delete Masks:

Deletes all the masks of a layer.

Delete Layer Markers:

Deletes all layer markers.

Delete Expressions:

Deletes all the expressions of a layer.

Disable Expressions:

Disables all the expressions of a layer.

Enable Expressions:

Enables all the expressions of a layer.

Reset Transformations:

Resets the transformation properties of a layer to their default values.

Reset All:

Deletes all the keyframes, effects, masks, markers and expressions of a layer and resets the transformation properties to their default values.
